## **2 REVIEW, SCOPE AND INSTRUCTIONS OF TEST EXECUTION**

The test will be executed as automated tests. The completeness and correctness of the scripts for the automated testing will be verified by code reviews during the development phase.

The test case plan will be approved for execution by the workflow / approvals in the electronic Document Management System (eDMS).

No manual tests will be managed by this document, therefore manual approvals / signatures on the test case plan / test case report are obsolete.

Successfully performed automated test do not require a formal test review. The executed test will be confirmed and approved by the workflow / approvals in the electronic Document Management System (eDMS).

As the test execution is fully automated, Jenkins (Technical Role) shall:

- Execute the code base test cases
- Record the test results and evidence after the execution and include them in the XUnit file
- Following Good Documentation Practices
- Mark the test cases as a "Fail" or a "Pass"
- Stop the test execution if one of the test cases has failed
- Report back the test execution results to the Test Management Tool
